**Kills insects**, such as adelgids, ants (except fire ants, harvester ants, carpenter ants and pharaoh ants), aphids, armored scale, beetle larvae, cankerworms, fungus gnats, lace bugs, leafhoppers, leafminers, mealybugs, mites, phylloxera, plant bugs, psyllids, scale insects, spider mites, thrips, sawfly larvae, spittlebugs, webworms and whiteflies.

**Kills caterpillars** including gypsy moth caterpillars, tent caterpillars, leafrollers and diamondback moth larvae.

**Kills beetles**, including flea beetles, Colorado potato beetles and Japanese beetles.

For soft-bodied insects, such as aphids and mites, use 2 teaspoons per quart of water. For use as a dormant spray, mix 4 teaspoons of Pyola with 1 quart of water. Do not use when temperatures are above 90°F. Thoroughly spray insect pests with diluted product until plants are wet. Repeat in 1-2 weeks, if needed. Pyola is multipurpose and:

- easy to use.
- kills egg stages of pests present in dormant season.
- can be used on fruits and vegetables, roses and flowers.
- may be used up to day of harvest.
